

## ORACLE EBS APPLICATIONS SOLUTION ARCHITECT

If you are a dynamic Solutions Architect with experience in the [Oracle E-Business Suite Projects family of applications](#) we'd like you to join our team of highly skilled Oracle Application consultants. We offer generous compensation and an opportunity to further refine your skills working with other experts.

### Responsibilities:

Become a key member of our client engagement team with responsibility to work on client pursuits, including proposal creation and presentations in the pre-sales process; working as part of the implementation team on projects and managing client accounts and expectations. Perform client assessments, identify problem areas, define and design solutions to solve problems and deliver solutions.

### Candidate Requirements:

- At least 10 years experience on client Oracle EBS implementations involving full life cycle work from initial requirements gathering, solution design and delivery. Preference is project centric clients using the Oracle EBS Project Suite family and multiple engagements in 11.5.10 and R12.x.
- Must be skilled in integration approaches and strategies involving the Oracle EBS Project Suite, both with other Oracle EBS applications and non-Oracle applications.
- Hands on solution design and implementation of some or all of the following applications:
  - Oracle EBS Project Costing (PJC) and Billing (PJB) 11.5.x or R12.x
  - Oracle EBS Project Management (PJT), Release 11.5.10 Family Pack M or R12.x
  - Oracle EBS Project Resource Management (PJR), Release 11.5.x or R12.x
  - Oracle EBS Project Manufacturing (PJM) 11.5.x or R12.x
  - Oracle EBS Project Contracts (OKE) 11.5.x or R 12.x
  - Oracle EBS Core Financials R12.x
- Understanding of other Oracle E-Business Suite Applications and their integration with the Oracle Projects applications.
- US citizen and experience with government contracting entities highly desired
- Knowledge or experience with Grants Management is a plus
- Experience in performing analysis of existing client environments and providing an assessment and roadmap for solving existing problems required
- Experience configuring the E-Business Suite applications to fit client business needs
- Experience with business process design and change management very beneficial.
- Ability to work with end users and line-of-business managers to map Oracle applications standard processes to the business needs of the client
- Experience in identifying and documenting gaps and making recommendations to resolve gaps through solution design and/or process changes
- Knowledge or experience in multi country implementations desirable
- Ability to work in a team environment or individually
- Willingness and ability to travel extensively
- Excellent verbal and written communication skills
- Excellent references
