

Project Partners LLC Earns Oracle Certified Partner Status Mustang Engineering to Benefit

Half Moon Bay, Calif. and Houston, Texas, December 2, 2004 /PRNewswire/ -- Project Partners LLC, a leading provider of products and services supporting the enterprise project management community, today announced it has been awarded Certified Partner status in the Oracle ® PartnerNetwork (OPN). This accreditation will ensure that customers such as Mustang Engineering will receive new levels of service, reliability and support for their project management operations.

Mustang recently completed a successful implementation of Oracle's Enterprise Project Management and Financials applications. In selecting Project Partners LLC to provide implementation services, Mustang was looking for expertise in Oracle Applications and in the Engineering and Construction industry.

"In working with Project Partners it was evident from the beginning that we were dealing with experts in Oracle Projects, not a 'body shop.' Project Partners provided highly relevant experience that enabled Mustang to leverage Oracle applications to solve our most challenging requirements. We operate in a highly competitive industry. Delivering excellent service at a cost-effective rate is critical to our success and that of our customers," said Gary Whatley, Mustang's Manager of Corporate Systems. "Project Partners remains an important partner in our ability to leverage our investment in Oracle applications to reduce costs and deliver key information to our decision makers in a timely manner. Project Partners new Certified Partner status gives us even more confidence that their commitment to Mustang's operational excellence will deliver even more return on our Oracle investment."

"The success of the Mustang implementation emphasizes that it doesn't take an army of consultants to successfully implement Oracle Projects and Oracle Financials applications. Experience is the foundation of our expertise," said Randy Martin, managing principal with Project Partners.

"Project Partners' designation as an Oracle Certified Partner recognizes their high level of competency, underscoring years of dedication and commitment to Oracle-based solutions and services, and to Oracle customers," said Bronwyn Hastings, vice president of worldwide alliances and channels at Oracle Corporation. "Project Partners is a key player in Enterprise Project Management and they have demonstrated the quality of their services and products to over 100 joint customers."

About Project Partners

Project Partners, LLC is a privately held firm headquartered in Half Moon Bay, California, offering expert consulting services and software products to project-driven firms. Since 1997 over 100 firms around the world have selected Project Partners for expert services and products that extend the Oracle Applications solution, to increase productivity and reduce operating costs. An Oracle Certified Partner, Project Partners has executed global projects for clients involving tens of thousands of projects, thousands of users, multiple languages and currencies. Project Partners' OP3™ product integrates Primavera and Oracle Enterprise Project Management in one week or less. Project Information Center™ leverages the information that is stored in disparate corporate databases, ERP and project scheduling systems to create complex project and financial reports at various levels of flexible hierarchies. Project Loader integrates third party and legacy systems with Oracle Projects, for one-time conversions as well as on-going seamless data sharing.
