

Project Partners Cloud Process Scheduler for Oracle ERP Cloud

Pre-built, configurable Microsoft® Excel workbook to submit, control and monitor all scheduled processes and reports for Oracle ERP Cloud

Key Benefits

- Improve user productivity by 85%
- 1-click operation
- Rapid deployment
- Minimal training and immediate user adoption
- Secure application access at any time

Features

- Define one or more process sets
- Define process dependencies
- Setup fixed parameters once
- Identify and update variable parameters easily
- 1-Click start for process sets
- Easy red/green indicators for process completion status

Requirements

- Platforms: Oracle Cloud Applications Release 10+
- Microsoft Excel Versions: 2007+

Overview

Cloud Process Scheduler for Oracle Enterprise Resource Planning (ERP) Cloud advances use of Microsoft® Excel as a user-friendly interface for running all scheduled processes and reports with 1-click.

Cloud Process Scheduler is a process and report scheduler workbook available to the enterprise from Operations and Finance to HR and Sales. This workbook empowers these Teams to:

- Define periodic scheduled processes and reports.
- Setup fixed and variable parameters for each process.
- Update variable parameter dates quickly.
- Setup process dependencies.
- Start process and report sets with 1-click.
- Monitor the status of each process in the set as it completes.

Cloud Process Scheduler leverages both standard Excel features and web services to submit, control, and monitor one or more process or report sets needed to complete all processing in the ERP Cloud.

Manage Scheduled Processes and Reports in Oracle Cloud

With Project Partners' Cloud Process Scheduler you can organize all processes or reports into sets and predefine all fixed parameters for reuse. You can highlight variable parameters, such as dates, so that they are easy to identify and update. The scheduler will automatically honor the dependencies you define.

With Cloud Process Scheduler, all successful processes are highlighted in green. Any process that errors out is displayed in red allowing you to quickly determine and resolve issues. Processing is completed automatically, allowing your Team to spend more time on strategic business initiatives.

Deploying Project Partners Cloud Applications

Project Partners' Cloud Process Scheduler is delivered with a prebuilt, configurable Microsoft® Excel workbook and can be deployed out-of-the-box immediately. The worksheet's design can be rapidly adjusted to meet the user's requirements using standard Microsoft Excel formatting capabilities.
